

EXCLUSIVE NEW PRODUCT

ANCHOR X

Vinylester Chemical Anchor Resin

Anchor X is a **two-part, vinylester chemical resin** designed for anchoring threaded rod and post-installed rebar.

Usage

Suitable for use in a **variety of materials**, including concrete, aerated concrete, masonry, hollow block, and wood, it offers versatile and reliable performance for numerous applications.

Technical, safety, and loading **datasheets** are available for Anchor X, ensuring you have all the necessary information you need.

Approvals

The chemical anchor formulation boasts several **approvals and certifications**, including ETA Option 1 for anchoring in both cracked and non-cracked concrete, ETA for anchoring in masonry, ETA for post-installed rebar, and fire approval in ETA.

The chemical anchor formulation is WRAS approved for use with **potable water**.

It has also been tested for LEED (Leadership in Energy and Environmental Design) and is styrene-free, making it **suitable for use in enclosed spaces** along with an A+ VOC Classification.

Application

Designed for convenience, Anchor X can be used with a **standard coaxial dispenser** and is effective in both wet and damp holes.

The product has an **18-month shelf life**.

Testing

Pull-out testing is available from MCP Fixings if required, ensuring that you can verify the performance of this product for your specific needs.

Classification: H317 May cause an allergic skin reaction. H319 Causes serious eye irritation.
